

1. Camp water supply shutoff valve located at the south west corner of the girl sleeping area. The valve is a 4" gate valve, this valve will shut off all of the water supply to camp.

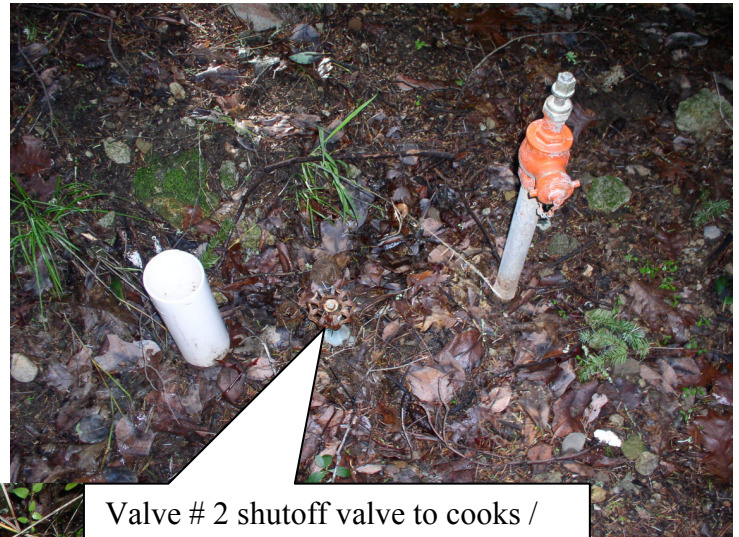

Note: Always open and close the valve slowly to prevent water hammer in the water lines. This will damage lines through out the system.

See map for location.

2. The shutoff valve # 2 for the cooks and nurse's building is located next to the fire hydrant below girls camp.

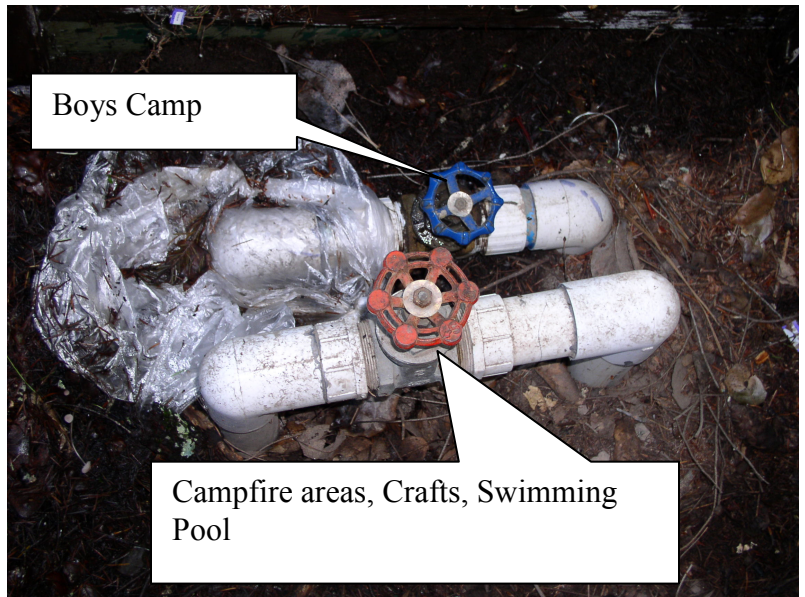

See map for location

Valve # 2 shutoff valve to cooks / nurses building

- 3. The shutoff valves for the pool, campfire areas and boys camp area is located at the southwest corner of the Administration building.

- 4. Shutoff valve for the Icemaker is located in the bathroom on the end of the kitchen. The filter is for the ICE maker and should be changed once a year.

- 5. Pool water supply located at the southwest corner of the pool filter house.
- 6. During winter months the shutoff valve # 1 should be closed and the hose bib opened to drain the system. There is also a drain valve on the back of the pool bathroom facing the creek area.
